

# 150 euro

for each registered and connected  
Fronius Primo GEN24 Plus

The Fronius Cashback Promotion for  
installers is back!

Between 01/10/2023 and 31/12/2023, you can  
receive a cashback of € 150 for each Fronius  
Primo GEN24 Plus inverter installed and  
connected online.

**Register, connect and earn!**

**From 1st October to 31st December 2023**, for EVERY Fronius Primo GEN24 Plus inverter installed and connected to the Fronius online monitoring platform Solar.web you can **receive € 150 in cashback**.

You simply have to:

### 01

Register as a participant in the promotion at:

<http://www.fronius.nl/solar-cashbackpromotion>

OR <http://www.fronius.fr/solar-cashbackpromotion>

### 02

Install Fronius Primo GEN24 Plus inverters (all sizes are included in the promotion).

### 03

Register the serial numbers in the appropriate section of the Fronius Solar.web portal and ensure all the systems are activated on the monitoring platform.

### 04

Reach the minimum threshold of 3 inverters registered and connected to guarantee the corresponding cashback (€ 150 for each inverter that meets the required conditions).

#### Example 1

By registering and connecting **four** Fronius Primo GEN24 Plus inverters to the Solar.web portal during the promotional period, you will receive a **total of € 600**. With the first three installations you reach a minimum threshold and therefore a credit of €450. With the fourth, a further €150 is added to the total that you will receive at the end of the promotion.

#### Example 2

Registration and connection to Solar.web of **two** systems with Fronius Primo GEN24 Plus. In this case you do not reach the minimum required by the promotion, so you will **not be entitled to any cashback**.

You will start accumulating credit with registrations and connections of **Fronius Primo GEN24 Plus** inverters completed **between and including 01/10/23 and 31/12/2023** providing you have registered as participating.

All required steps must be performed within the promotional period.

From 02/01/2024 you will receive an e-mail detailing the final amount of accumulated credit along with instructions for issuing an invoice for this amount to **Fronius International GmbH**. You will then have until 14/01/2024 to issue this electronically.

This initiative is reserved exclusively for inverters registered and connected in Belgium, Netherlands and Luxembourg.
