

# Solar Inverter Starter Kit

- The Solar Inverter Starter Kit is a perfect tool to start up a solar string inverter.
- Thanks to its technical characteristics, this device can be used with most string-inverters.
- Typical applications :
  - Starting up / setting up inverters to make the system operational.  
Example : when installation is not finished or when too dark outside
  - Check the operation of the inverter.  
Example : To check whether an error is caused by the solar panels or the inverter.

## Technical details :

Input :	100-240Vac	50/60Hz	2,7A max	$\lambda$ : 0,95
Output :	180 - 370Vdc	0,7-1,05A	Rated Power 240W	Default Current : 0,7A
Connections :	AC :	2P+N european		
	DC :	MC4
